LUMINA

Deep Search - Across All Extensions

INTRODUCTION

Lumina is an offline, multimodal desktop search engine that acts as a "Second Brain" for your computer. Unlike traditional search tools that only match file names, Lumina deeply understands the content inside every file on your hard drive—PDFs, videos, images, and audio files.

PROBLEM

- Fragmented Data
- Inefficient Retrieval
- Privacy Concerns

SOLUTION

- Unified
- Offline
- Semantic Search

SALIENT FEATURES

Privacy First
100% Offline, Secure
Local Data Processing

Zero-Touch AI
Automatic, Continuous
Background indexing

Fast Performance
Optimized Vector Search
for instant results

AI Fusion
Multiple AI models integration
for better understanding

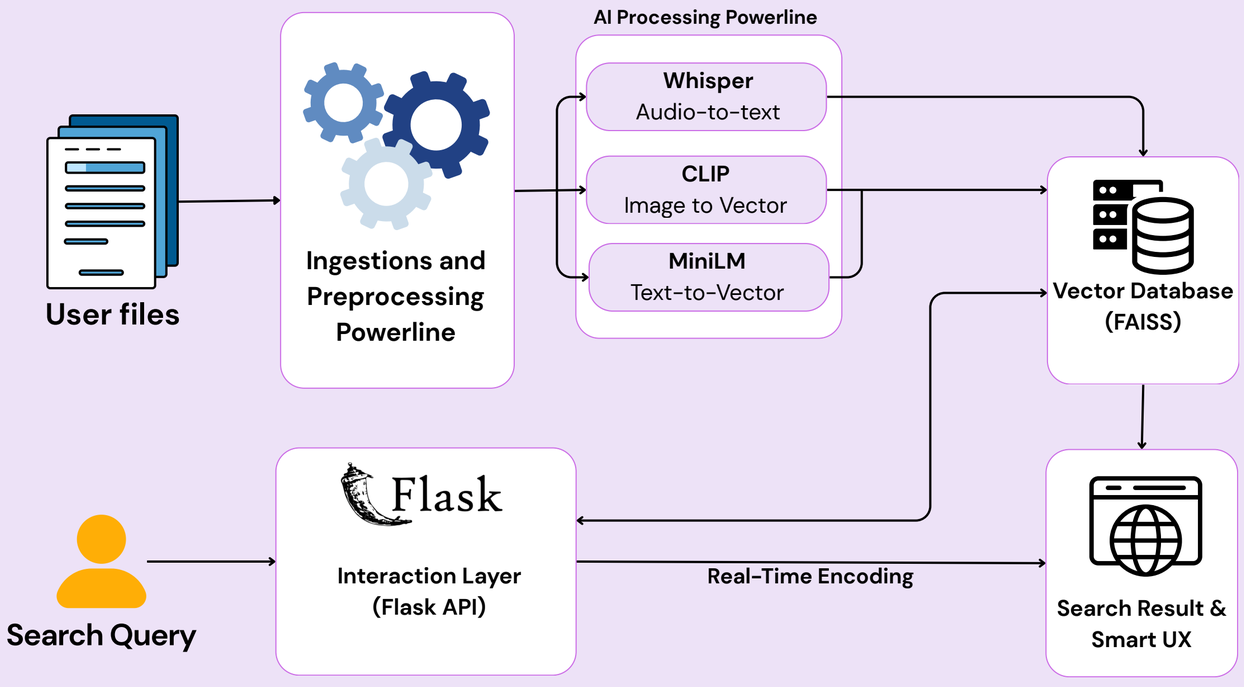

Analytics Dashboard
Visualize usage
and Data Insights Locally

Smart UX
Intuitive interface with
personalized suggestions

AI Expandability
Transparent Results, with
contextual explanations

Semantic Search
Search by meaning, not
just keywords

FLOW CHART

Future RoadMap

Phase 1	Phase 2	Phase 3	Phase 4	Phase 5
Semantic File Relocation	Expanded Knowledge Bases	Voice-to-Knowledge	Secure Multi-Device Sync	Advanced AI Integration

TOOLS USED

Whisper · HUGGING FACE · Easy OCR · FAISS (FACEBOOK AI SIMILARITY SEARCH)

Group Members
